

Your contribution

When we work out how much money the ILF may be able to offer you, we take into account the following benefits if you get them.

- **Disability Living Allowance (DLA)**

To apply to us for payments you must already be receiving the higher rate care component of DLA. We take half of this benefit into account when working out how much we may be able to offer you.

- **Severe Disability Premium (SDP)**

If you get Income Support, Income Based Job Seekers Allowance or Pension Credit Guarantee Credit, we take the SDP part into account. You must tell us if you get SDP because it will affect the payments you get from us. If you do get SDP, this will be shown on your Income Support or Pension Credit Guarantee Credit statement under "*How your benefit is worked out*", where it will say—

"Because you are severely disabled".

BD1—Issue 3—April 2008

Need Personal Care and Domestic Assistance?

This leaflet is about who we are and how we may be able to help you.

About the Independent Living Funds (ILF)

The ILF may make payments to disabled people to be used towards the cost of them employing Personal Assistants (PAs) or using a care agency to give them personal care and domestic assistance. The money comes from the Government and it enables people to live at home with choice and control over the assistance they receive. The ILF is a discretionary organisation, which means we can decide not to pay someone even if they meet all the conditions to get ILF payments. The ILF is managed by a board of 9 Trustees and has recently become an Executive Non Departmental Public Body.

To get help from the ILF you must meet **all** the following conditions:

You must get at least **£320 worth of support a week or £16,640 a year from**

Social Services. This support could be something like going to a day-centre or getting money from a direct payment scheme.

You must get the **higher rate care component** of Disability Living Allowance (DLA).

You must be at least **16** and under **65**. If you apply before you are 65, the funding can continue after your 65th birthday as long as you still meet all the other conditions.

You must be living in the UK and expect to live in your home for **6 months** after you have applied.

You must have **less than £22,250** in savings/capital (this includes any money your partner has).

How can I apply?

There are 3 forms you and your Social Services Department have to fill in to apply to us. You will have to fill in some of the forms and your social services department also have to complete some of the sections.

The forms are -

- Application Form
- Financial Information Form
- SSD 1000

Once we have received all of the 3 forms back we will check you meet all the conditions.

We will give priority to applicants who fall into two groups. The first priority group is:

- People who are paid to work 16 hours or more each week

The second priority group is:

- People who are getting Income Support, Income based Job Seekers Allowance, Pension Credit Guarantee Credit or similar income and whose total care package costs £500 per week or more.

All the forms you need to apply to ILF are available from us, or from your local authority social services department. You can also download them from our website. Details about how you can contact us are on the back of this leaflet.

What happens next?

One of our assessors will come out and visit you with a social worker from your local authority.

The meeting is to find out more about your needs and we will use the information to work out how much money we may be able to offer you.
